

DIEGO JOSE NAVARRO RUIZ

QA Lead / SDET – Automation & Quality Engineering

Bogotá, Colombia | diegojose150@gmail.com | +57 300 339 1905

linkedin.com/in/diegonava150

Summary

QA Lead transitioning into SDET with experience designing and scaling automation solutions across gaming, web, mobile, and streaming platforms. Proven ability to manage automation pipelines, improve QA workflows, and drive efficiency through tooling and infrastructure. Strong collaborator with engineering teams to troubleshoot and optimize automation systems, with hands-on experience in Playwright and modern testing frameworks.

Technical Skills

Automation: Selenium WebDriver, Playwright (hands-on), Cucumber, Gherkin

Familiar / Exposure: Cypress, Appium, REST Assured, WebdriverIO, JUnit

CI/CD & Tools: Jenkins, GitHub Actions, Automation Pipelines

Testing: Functional, Regression, Smoke, Exploratory, UAT, Integration

APIs & Debugging: Postman, Charles Proxy, Proxyman, Datadog

Other: SQL, NoSQL, Jira, Xray, TestRail, QMetry, Agile/Scrum, AEM, Adobe Target, AJO

Professional Experience

Electronic Arts (EA) – QA Lead / Automation POC | Jan 2026 – Present

- Led end-to-end ownership of automation pipelines for large-scale validation processes, including execution, monitoring, and failure analysis.
- Defined and implemented automation strategies improving QA efficiency and reducing manual validation effort.
- Supported distributed automation infrastructure (test environments, execution setups, configurations).
- Contributed to automation script configuration and execution logic (JSON/Python-based workflows).
- Collaborated with engineering teams to troubleshoot issues and improve automation reliability.

- Delivered reporting, insights, and UAT validation of automation tools to support release decisions.
- Identified opportunities for automation expansion and cross-team workflow improvements.

Jerónimo Martins – QA Engineer (Test Lead) | Mar 2025 – Jul 2025

- Led test planning, coverage definition, and release validation across teams.
- Coordinated QA activities to ensure delivery quality and alignment.
- Designed and executed regression, functional, and smoke tests.
- Managed defects and test tracking using Jira/Xray.

Adobe – QA Engineer | Nov 2025 – Jan 2026

- Executed QA for mobile and desktop applications focusing on user flows and UI behavior.
- Performed regression, smoke, and functional testing across devices.
- Validated content workflows using AEM, Adobe Target, and AJO.

LA Clippers – QA Engineer | 2024 – 2025

- Performed API, analytics, and UI validation for web and mobile applications.
- Conducted network debugging and validation using proxy tools.

Additional Experience

Streaming QA Engineer (Disney+, ESPN, Vix): Performed end-to-end validation of playback, onboarding, navigation, and content delivery across platforms.

QA Trainee (Globant): Built foundation in functional testing, defect tracking, and basic Selenium automation.

Education & Certifications

QA Testing Bootcamp

ISTQB Foundation Level V4.0 Complete Training

Scrum Fundamentals Certified (SFC)
